**Bibliography for Child Analytic Continuous Case with Emphasis on Latency Development,
Technique and Play**

Instructors: Alex Harrison and Judy Yanof

The readings on this list are suggested readings that we have selected to give you some background on the developmental phase of latency. The bibliography includes some classics as well as more current contributions. In class our primary focus will be on the analytic material, and, therefore, we will not take up the articles in any extensive way unless there are questions or an article is particularly related to the case material. Nevertheless, doing the reading will give you a foundation upon which to better understand what you are hearing.
