Introduction to Technique: Essential Concepts

Section 1: Catherine Mitkus, LICSW
and Lilia Feinberg, MD

Section 2: Carole Drago, LICSW
and Mary McCarthy, MD

Section 3: Barbara Roney, LICSW

Welcome to this seminar! The content of this course introduces essential concepts of psychodynamically informed technique within an historical context. Our intent is that the readings and class discussions will act as a bridge between theory and technique. During the next ten weeks we will be thinking together about how to create and maintain an analytically influenced frame and attitude. We will also explore how we listen to our patients, how we understand our own and our patient's experience, and consider how, when, and why we intervene during the clinical hour. We will also look at some of the technical difficulties that can arise during our work. We hope that the readings will prompt your associations to your clinical work, and that you will feel free to share these reflections during class discussions.
